Biography

Dr Oldmeadow is the Director of the Clinical Research Design, IT and Statistical Support (CReditSS) Unit at HMRI. Dr Oldmeadow is an applied statistician with an international reputation for managing, maintaining and analysing large complex health related data sets. He oversees statistical consultancy projects from various fields of research, including Cancer, Stroke, Cardiology, Respiratory, Public Health, and Health Services. He has a strong track-record in co-ordinating the analytic plans of research projects. He has years of experience as the statistical leader for the design, analysis and data management of clinical studies, ranging from Pilot/Phase1 through to Phase 4, and across the spectrum of translational research.

Dr Oldmeadow's methodological expertise spans a broad range of experimental settings such as single arm trials, parallel group, cross-over, stepped-wedge; biomarker and diagnostic studies; as well as observational studies, registries and linked administrative data sets. He is also actively researching statistical methodologies in biostatistics in the areas of causal modelling, missing data, and Bayesian statistics.
